

NERF Zone is home to action packed indoor sessions where children aged six and above can put their NERF skills to the ultimate test. Each session is led by a NERF Commander who will brief you on all things NERF Zone.

You will be supplied with a special kit complete with a target vest, goggles and, of course, the all-important NERF blaster. Sharpen your skills as you take on the target range - your chance to gain as many points as you can and prepare for the battle ahead.

After training it's time to enter the combat arena, where your NERF Commander will guide you through the game - try to avoid getting tagged by your opponents!

You don't have to rely on the weather to have a great day out at NERF Zone – our popular indoor attraction open throughout the year – but it's best to reserve your time-slot in advance to avoid disappointment.
