## The Story of Bramleys Brasserie

In 1991 the original Bramley's Seedling apple tree, which has its home in Southwell, Nottinghamshire, was under attack on two fronts - old age and honey fungus.

Biologists from the University of Nottingham saved the tree from the fungus and it's still fruiting to this day. But they also ensured the future of the Bramley Apple, by using modern biotechnology methods to clone the original tree, thereby preserving this unique fruit.

Now, 12 of the cloned trees are thriving in the Millennium Garden on University Park. This guarantees that future generations of gardeners will have access to the original form of the 'Bramley's seedling', even after the original tree inevitably stops fruiting.

The Orchard Hotel pays homage to the Bramley Apple by naming its restaurant 'Bramleys Brasserie'.

Bramleys Brasserie is situated within the Orchard Hotel
